

The Tyrant's Lament

The ancient ship hurtled through the void, hunting its enemies to the edges of space.

Setup: When setting up the unit card for this ancient, draw 6 attack cards and create piles of combat, defence, and movement modules, if able, on the Tyrant's Lament unit card, facing up.

Movement: At the end of a space combat, move the ancients token to an adjacent non-home system that is closer to a system that contains ships controlled by the player with the most victory points, if able; the active player breaks ties.
